AMP IM Extinguishing Panel Interface Module AMP

Interface Module for interconnection of an Extinguishing Panel to Aerosol Management Panel

Features

▮ Interface module for Exintinguishing Panel with monitored output.
▮ Input from Exintinguishing Panel.
▮ Output to Domino Aerosol Management Panel

Descriptions/Applications

The module is used to connect an Exintinguishing Panel to a Domino Aerosol Management Panel.
The module must be used when the Exintinguishing Panel has a monitored output.
The module provides the correct interface between AMP and the Exintinguishing Panel to prevent accidental activation and not real fault messages on AMP.

AMP IM Extinguishing Panel Interface Module AMP

Technical Specifications	
Dimensions	39 x 76,8 x 22mm (1,54x3,02x0,87in)
Weight	0,1 kg (0,22lb)
Materials	ABS Cabinet
Mounting	Surface
Protection Class	IP32
Operating Temperature	-20°C to +80°C (-4°F to 176°F)
Storage Temperature	-40°C to +90°C (-40°F to 194°F)
Inputs	▎ 1 from extinguishing panel
Outputs	▎ 1 to Domino Aerosol Management Panel

Product name	Description
AMP IM	Extinguishing Panel Interface Module for AMP
