

AMP BOX 1 Aerosol interconnection Box

Aerosol Generator Interconnection Box to Domino systems

Features

- Box to interconnect Aerosol generators to the Domino systems activation output
- Input/Output for the Aerosol Activation line connection
- Output with connector for one aerosol generator
- IP55

Descriptions/Applications

The Aerosol Interconnection Box is necessary to connect Aerosol generators to Domino systems activation output. The Box must be used when the number of Aerosol generators connected to the activation output are more than one. The Box ensures the transfer of the right current to the Aerosol generators during the extinguishment.

AMP BOX 1 Aerosol interconnection Box

Technical Specifications	
Dimensions without connector	105 x 105 x 56 mm (4,13x4,13x2,20 in)
Weight	0,2 kg (0,44lb)
Materials	ABS Cabinet
Mounting	Surface Mounting
Protection Class	IP55
Operating Temperature	-20°C to +80°C (-4°F to 176°F)
Storage Temperature	-40°C to +90°C (-40°F to 194°F)
Inputs	1 from activation line
Outputs	1 to other boxes (activation line) 1 to Aerosol Generator

Product name	Description
AMP BOX 1	Extinguishing Panel Interface Module for AMP
